

Quiet, reliable and efficient operation in a quality design: the John Wood[®] Direct Vent water heater. The balanced flue design with a side wall vent termination allows installation in locations without a chimney. The sealed combustion chamber and co-axial vent uses fresh air taken from outside rather than pre-heated air from within the home. Ideal for applications where space is at a premium.

Features

Designed for Performance

- Thermopile design provides robust pilot to withstand down drafts and environmental conditions
- LED indicator:
 - Gives visual confirmation that pilot is on by flashing continuously
 - Provides diagnostics and troubleshooting
- Easy temperature adjustments
- Direct vent design means no external power supply or chimney required for operation/installation
- 90" coaxial vent supplied with water heater
- Top mounted heavy duty anode rod for added tank protection
- Glass-lined tank for longer life
- Factory-installed plastic-lined nipples with heat traps
- Automatic gas control
- CFC-free foam insulation
- 50 gallon high input model available for combination applications
- Suitable for closet installations
- 3/4" side taps available on 50 gallon high input model for combination applications

Safety Features

- Sealed combustion chamber design, eliminating the need for a Flammable Vapour sensor

Serviceability

- Combustion chamber is easy to access
- Conveniently located T&P and drain valve for ease of installation and serviceability

WARRANTY

8 Year Limited Tank Warranty

6 Year Limited Parts Warranty

Consult installation manual for terms and conditions or visit www.johnwoodwaterheaters.com for more information.
